

AIR1, a FM translator service is highly important in the Wichita community. There are no other radio stations that cover the music, news and notices that are covered by Air1. If this station were to be displaced by an LPFM broadcaster, this variety of broadcast would no longer just be rare, but completely dissolved in this community and throughout the nation. Because Air1 is so unique in its broadcast and also in its audience, loss of this station would leave all of us without this variety.
